HISTORY/FACTS/ISSUES:

This glass crusher was purchased in July of 1999 by the Solid Waste Department. The machine was used regularly for six months after being installed. Lack of a viable market for crushed glass led to it being used sparingly and the machine has not been used at all since December of 2005. Sumter County will disconnect the electricity to the machine. Lake County will be responsible for the removal and transportation of the machine, reassembly, and all electrical connections upon arrival at their facility. This machine is in good operating condition, representatives from Lake County have seen the machine in operation, and the machine is being sold "as is".
